

Dear MoveApps user,

over the last month we have been working on different aspects to improve the options and usability of Workflows. Here we you like to inform you about the major changes and new features:

- In the Output of each Workflow, you can now find a document named *"Selected App-Settings.pdf"*, this file will contain the selected settings for each App of the Workflow instance. In order to save the settings of interactive Apps with a User Interface (UI), the 'Store settings' button must be clicked after customizing the settings.
- As some Apps require passwords, we have added a new setting type, called 'secret', to ensure that your passwords are not shared in the selected App-settings document, nor when sharing your Workflow with others.
- We have changed the layout of the own Workflow overview. This will be a big change, and will take all of us a bit of time to get used to, but it comes with lots of benefits. *This is a heads up, as we will make this change available beginning of next week.* Here a preview with some explanations:

Your Workflows

These workflows belong to you. You can edit, categorize, share or submit them for publishing as you wish.

Search in title and description of Workflows and Workflow instances

Search your Workflows

Select one category. If none is selected, Workflows of all categories are displayed

Categories

Common walkthroughs | EMAC23 | For development | Imported Directly Shared Workflows | Imported Public Shared Workflows | shared now | show cates | support

test alternative data source EMAC WPs | tests | Uncategorized | User Manual Examples | WF API

Use any of the columns for sorting

Create a new Workflow ⓘ
Analyse data in a new way by creating a new workflow to use, share or publish.
CREATE NEW WORKFLOW

Sharing or publishing Workflows is accessed here

Workflow	Category	Last run	Created

And last, we are pleased to share with you the paper that recently has been published: "[Citizen scientists for MoveApps: Innovations and insights from volunteer coders in wildlife conservation](#)". This paper is the culmination of the EMAC23 coding challenge and follow up workshop that we held in 2023. During the workshop we decided to write up a paper all together to share the experience and the lessons learned in engaging citizen scientists as volunteer code developers.

A huge thank you to Margaux, Chloe, Matthias, Bo, Christoph, Vee, Matt, Jed, Alex, Lauren, Tomé and Arky for participating in the challenge and making this a very fun and enriching experience!!

With kind regards,
Anne Scharf
